

Digit4all

Digital skills and computer equipment for all

Project Number: 2022-1-FR01-KA220-VET-000085269

About the project

The project "DIGIT4ALL" is an Erasmus+ KA2 project that aims to support individuals in acquiring and developing basic digital skills by providing them access to computers and digital training. The main goal of the project is to enhance integration in the workforce and society while promoting the need for the sustainable reuse of digital equipment. This will be achieved through several workshops that will offer people guidance on how to access common digital tools and upgrade their digital knowledge using open-source software. Additionally, the project aims to improve access to training and qualifications for all.

Exploring the Second Phase of the Digit4all Project: Creation of the Digit4all Workshop activities

Workshop Implementation Guide and Methodology Piloting

The main focus of our current work package involves the creation of a comprehensive workshop implementation guide. This guide will serve as a blueprint for piloting our methodology, which includes testing placement tests, learning modules, and activities in Vocational Education and Training (VET) centers.

Preliminary Training for Project Staff: To ensure the successful execution of our workshops, our team will undergo preliminary training to become proficient tutors for the Digit4all Workshop. This training will encompass the use of tests, learning modules, activities, guides, and methodologies. Equipped with this knowledge, our tutors will implement the workshop in VET centers and evaluate its pedagogical effectiveness.

Content of the 5 Sessions

Sessions 1: Candidates will undergo a placement test to assess their digital proficiency across various topics. This test will help identify areas of improvement and the need for computer literacy among trainees.

Sessions 2: An activity focusing on selecting a suitable computer, understanding its components, and guidance on purchasing a second-hand computer.

Sessions 3: Participants will install free and open-source operating systems and basic software on their computers, promoting accessibility and cost-effectiveness.

Sessions 4 & 5: Intensive training modules tailored to address specific needs identified in the placement test, covering topics such as digital environment identification, information acquisition, collaborative interaction, digital security, and e-learning platform utilization.

By providing tailored training and access to affordable technology, we aim to empower individuals with digital competencies, enabling them to participate effectively in online learning environments.

Learning, Teaching and Training Activity and 3rd Partners Meeting in Spain, Torre del Mar

16-18 January 2024

From January 16th to January 18th, 2024, CIS hosted the third meeting of the DIGIT4ALL project in Spain, concurrently serving as the venue for our LLTA. Throughout this gathering, partners engaged in extensive discussions and made critical decisions regarding the final steps before concluding the project, with a primary focus on the piloting of online materials.

A significant aspect of the meeting was the training conducted over most days, involving trainers from representative countries. The Learning Teacher Training Activity (LTTA) held particular importance, as it provided essential preparation for the pilot training in each partner country. Trained teachers are crucial for effectively conveying workshop content during the pilot phase. Moreover, these teachers will subsequently pass on their knowledge to other trainers within partner training centers, thereby amplifying the dissemination of digital literacy topics and maximizing the impact of the Digit4all project.

Additionally, partners finalized plans for the upcoming final meeting scheduled for May 15th and 16th, 2024, in Italy.

Stay tuned as we continue our journey to empower individuals with digital literacy skills!

The Partnership

OSENGO – France (coordinating organization)

Center for Social Innovation (CSI) – Cyprus

INSTITUT ZA PODGOTOVKA NA SLUJITELIV MEJDUNARODNI ORGANIZACII ZDRUZHENIE (ITPO) – Bulgaria

Compass – Beratung, Begleitung und Training Gemeinnützige GmbH – Austria

Consultoría de Innovación Social (CIS) – Spain

WISAMAR BILDUNGSGESELLSCHAFT GEMEINNUTZIGE WISAMAR BILDUNGSGESELLSCHAFT GEMEINNUTZIGE – Germany

Euroform – Italy
