

WELCOME WIN-APP

The WIN-APP, an innovative tool developed within the Erasmus KA2 WINC2021 project, is finally available on Google Play and AppleStore. It was created to facilitate access to the system for validating previous experiences (VAE) of migrants.

An innovative tool for validating migrants' experiences!

What is **WIN-APP**?

WIN-APP is a revolutionary tool designed based on the needs of migrants in Europe and aimed at improving access to the validation system of non-formal experiences. Designed to implement the new methodology for Validation of Migrant Experiences **WIN-VAE**, this advanced app has been developed to simplify and optimize the process of validation of skills, allowing migrants, validators, experts, facilitators and practical test centers to manage the entire process remotely.

Thanks to **WIN-APP**, migrants can face the validation process in a simpler and more intuitive way, while all other actors can use a tool to support the process.

The **WIN-APP** represents a central element for the application of the **WIN-VAE** validation methodology, allowing access to the validation system for users who are often excluded. Thanks to **WIN-APP**, operators will have a tool that will help them more easily recognize the skills acquired by migrants in their life and work experiences. This process not only improves the performance of operators, but also helps to promote greater work and socio-economic inclusion for migrants.

With **WIN-APP**, we aim to create a future in which no one should remain on the margins of society. Join us on this journey of innovation and inclusion!

**A new way to
validate migrants'
experiences**

Discover **WIN-VAE** methodology...

The WIN-VAE methodology is the result of an in-depth analysis between European validation methodologies, the perspectives of European validators and the needs of migrants.

The validation process includes the following phases:

1 Reception Phase

The Reception Phase aims to introduce the migrant to the steps of the process, to provide him with all the useful information and to collect the first elements useful for validation. During this phase the migrant can select his own validator and/or facilitator.

To start the process Install **WIN-APP!!!**

2 Identification Phase

During the identification phase, the migrant presents his/her experiences and provides evidence to support his/her abilities. The validator will “translate” them into skills to be assessed and define the subsequent steps.

3 Validation Phase

During the Validation phase, the migrant selects an expert and will take tests to demonstrate the possession of the skills. The expert will decide what type of test is necessary based on the evidence provided by the migrant.

4 Certification Phase

The migrant, after having successfully completed the previous phases, will be able to easily download and view his/her certificate on his/her smartphone.

Join us in WIN-APP!

Interactive activities

The WIN-APP includes interactive activities that make the validation process engaging and enjoyable. From quizzes to simulations, these activities will help migrants test their skills and gain confidence in their abilities.

Step-by-step validation

Through the app, it is possible to assist migrants in the validation process step by step, from the initial assessment of skills to the final certification. Migrants will have access to all the tools and resources needed to complete the validation process.

Times and schedules

Migrants are provided with a timetable at each stage of the process, so they know what to expect and when.

Tools and resources

La WIN-APP fornisce ai migranti tutti gli strumenti e le risorse necessarie per completare con successo il processo di convalida. Dagli strumenti di autovalutazione ai materiali di studio, abbiamo tutto ciò che vi serve.

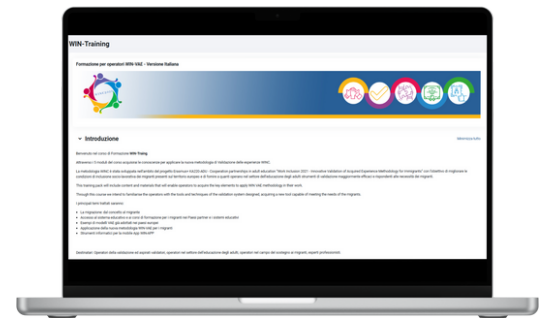

...become a **WIN-VAE** validator too

Sign up now for WIN-Training, the distance learning course (FAD) designed to expand and enhance the skills of certification operators and future validators. This training program will offer you the opportunity to acquire the key elements of the new WIN-VAE methodology, specifically developed for the validation of migrants' experiences.

WIN-Training is a fundamental resource that integrates multimedia materials, detailed manuals and practical instructions on how to effectively apply the VAE methodology to migrants.

Only by participating in WIN-Training will you be "qualified" to use the innovative WIN-VAE methodology.

At the end of the course, you will be issued a certificate of attendance that certifies your preparation and competence in using the WIN-VAE methodology.
